This petition is to raise concerns regarding the proposal for the Sports Zone at Yeovil Recreation Centre and to object to the development going ahead on this site.

The concerns are many and include:

- The size of the development on what is one of the few green spaces left in the area: it's too big. We feel a development on this scale would be more suited to a site on the edge of town with less negative environmental impact
- It is stated that the green spaces will remain, but these have been dramatically reduced. There is currently the opportunity to experience an open environment and have some brief respite from the everyday hustle and bustle. Concrete, tarmac and artificial turf will not have the same therapeutic effects.
- The effects of the inevitable increase of traffic in the area, leading to more congestion and pollution (the surrounding roads already suffer from severe congestion, plus new housing developments in the area will put a greater strain on the road system).
- Pollution from traffic, lighting and noise.
